## Graduate Programs

To complete their degree, all students enrolled in a Graduate Program at Nagoya University must conduct independent research. An academic supervisor guides them in designing a research project, collecting and analyzing data, and submitting a thesis or dissertation. When applying, everyone must submit a research proposal.

Automotive Engineering Graduate Program (Master)
The program aims to cultivate expert researchers and engineers in automotive engineering. The curriculum combines various fields from the Graduate School of Engineering to assist students in obtaining a comprehensive understanding of advanced automotive engineering topics including electronics, mechanical systems, control systems, and environmental engineering. Students will be exposed to state-of-the-art concepts in automotive engineering through lectures and conduct research projects in collaboration with automotive companies.

Chemistry Graduate Program (Master/Doctoral)
The program aims to cultivate global leaders in molecular functional materials science through education and research while instilling values such as morality, independence and respect for other cultures. World-renowned researchers in the chemistry field from the School of Science and the School of Engineering of Nagoya University collaborate to establish a global education and research center in all areas of pure and applied chemistry.

Comparative Studies of Language and Culture Program (Master)
The program is designed to satisfy students interested in Japan for comparative research in linguistics or cultural studies. It is divided into two sections, Language & Linguistics and Culture & Society, but a key feature of the program is that students are given the maximum freedom to tailor their curriculum according to their individual research interests by taking courses from both sections. Areas of expertise within the Language & Linguistics section include linguistic typology, cognitive linguistics, psycholinguistics, second language acquisition, second language processing, and critical discourse analysis. Within the Culture & Society section, specialists cover a wide variety of areas including demography, sexuality, nutrition, fashion, popular culture, media, online communication, cartography, medical history, the history of technology, Economics and Cultural Studies, American and Japanese literature from the Edo period to the present day.

Civil and Environmental Engineering Graduate Program (Master/Doctoral)
The Program aims to foster future global leaders who can achieve high-quality social infrastructure improvement through course work, research and internship in Civil and Environmental Engineering. Students can acquire fundamental and specialized knowledge and ability in various fields, such as Structural and Building Engineering, Hydrodynamic Engineering, Geotechnical Engineering, Transportation Planning, Infrastructure and Environmental Planning, and Environmental and Safety Engineering.

Graduate Program in Economics and Business Administration (Master)
The program aims to prepare students for a career as an international business leader by empowering them with the understanding of globalization in economics and management. Apart from knowledge of modern economics and business, the unique system of Japan will offer one of the key goals in the program to draw upon its experiences from both successes and failures.

Medical Science Graduate Program (Master/Doctoral)
The program sets the medical school as a gateway to the international society by enhancing the understanding of globalization in economics and management. Apart from knowledge of modern economics and business, the unique system of Japan will offer one of the key goals in the program to draw upon its experiences from both successes and failures.

Physics and Mathematics Graduate Program (Master/Doctoral)
In this program, a traditional curriculum in law and politics is complemented by social studies, and other events organized regularly in Nagoya and across Asia and Japan and the world by the Japan-Area Cultural Research Center (the Graduate School of Letters (JACRC)). After completing the Master’s program, you can continue developing your research in a PhD program, or apply your knowledge and skills in governmental, commercial, and other ventures. In either case, the in-depth knowledge, broad views, and keen insights cultivated in this program should prove invaluable in grappling with the tensions and problems of international relations in the 21st century. Apart from knowledge of modern economics and business, the unique system of Japan will offer one of the key goals in the program to draw upon its experiences from both successes and failures.

Program in Law and Political Science

Other International Programs

LL.M. (Comparative Law) and LL.D. (Comparative Law) Programs in Law and Political Science, Department of the Combined Graduate Program in Law and Political Science

In this program, a traditional curriculum in law and politics is complemented by social studies, student membership arrangements, and governmental and public sector internships. Students may take advantage of language instruction through the Education Center for International Students, annual participation in the Japan Inter-College Negotiation Competition, and a set of student-driven cross-national initiatives (the Peace Support Initiative). The extended features of our environment supplement the academic program, creating additional opportunities for cross-border and cross-cultural teaching and learning.

International Development and Cooperation Course (Master/Doctoral)
The program aims to equip students with knowledge of various aspects of development. By imparting knowledge and understanding of the realities of the developing world, students will be equipped with skills to work in a variety of related professional fields. Drawing on Japanese development experience, it provides alternative perspectives which should offer a new dimension to development theory.

Nagoya University Global Environmental Leaders Program (Master/Doctoral)
Nagoya University Global Environmental Leaders Program (NUGELP) is to foster future environmental leaders who can propose concrete solutions to various environmental problems around the world, particularly in Asia and Africa. NUGELP is interdisciplinary and covers various research fields such as Civil Engineering, Environmental Systems Analysis, Transportation Planning, Land Use Planning, Architecture, Economics, and Policy Studies.

Young Leaders’ Program (Master)
The Young Leaders’ Program at Nagoya University is a one-year Master’s degree course in Healthcare Administration. The Young Leaders’ Program (YLP), which aims to foster the development of future leaders in Asia and other countries, is one of the Japanese Government Scholarship Student systems and is supported by a network among national leaders, contributing to the establishment of friendly relationships and improved policy-making among Asia and other countries including Japan. (Not open for general admission)
