Oral Presentation Award (The 23rd Congress of the Japanese Society for Regenerative Medicine) 2024

A Message of Encouragement for Future G30 Students:

Some of my fondest memories from Nagoya University come from the one-on-one conversations I had with the G30 professors. Thanks to the relatively small student-teacher ratio, many students form personal connections with their professors. Whether you need career guidance or support with challenges outside the classroom, the G30 professors are always willing to help—they genuinely care about their students. Academically, the program provides a strong foundation for conducting high-level research, whether in academia or industry. I wholeheartedly recommend Nagoya University as a solid first step in building your career.
